

Sangeeta Kumari Yadav

Lucknow,Uttar Pradesh | 7985520231 | sangu7985@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

EDUCATION

Technical Education and Research Institute PG Collage
Bachelor's degree in computer application

Ghazipur,Uttar Pradesh
Graduation Date: Jun 2024

Shri Ramswaroop Memorial University
Masters in computer application

Lucknow, Uttar Pradesh
Graduation Date: Jun 2026

WORK EXPERIENCE

42Peaks

Lucknow,Uttar Pradesh

Data Science Specialization

Aug 2025 - Dec 2025

- Learn about all models in machine learning, build real time projects.
- I gained practical knowledge in Data Analysis, EDA, ML, Python Libraries.

PROJECT EXPERIENCE

42Peaks

Lucknow,Uttar Pradesh

Hierarchical Clustering on Iris Data

Oct 2025 - Oct 2026

- Used load_iris() from scikit-learn, extracted features, and scaled them using StandardScaler to normalize different measurement scales.
- Generated the linkage matrix with linkage (X_scaled, method='ward', metric='euclidean') and plotted a dendrogram with a horizontal cutoff line to obtain 3 clusters.

Bagging for Classification and Regression (Breast Cancer & Housing)

Nov 2025 - Nov 2025

- Loaded data using load_breast_cancer() and created train-test splits with train_test_split. Trained a baseline DecisionTreeClassifier(random_state=42) and then a BaggingClassifier with DecisionTreeClassifier as the estimator, n_estimators=100, max_samples=0.8, and oob_score=True.

Customer Churn Prediction Using Deep Learning (ANN)

Dec 2025 - Dec 2025

- Downloaded the dataset using kagglehub.dataset_download("shrutimechlearn/churn-modelling") and loaded Churn_Modelling.csv into a pandas DataFrame.
- Applied one-hot encoding with pd.get_dummies on Geography and Gender (using drop_first=True), then cast to integer type.
- A simple two-layer ANN, combined with proper preprocessing and scaling, can learn meaningful patterns for churn prediction and achieve strong validation accuracy on bank customer data.

SKILLS AND INTRESTS

Skills: Exploratory Data Analysis (EDA) | Data Cleaning & Preprocessing | Statistical Analysis | Hypothesis Testing | Feature Engineering | Data Interpretation | Regression Models | Classification Models | Predictive Modeling | Model Evaluation & Optimization | Recommendation Systems | Python | Data Visualization Libraries | Statistical Computing | SQL | Power BI | Panda | Advance Excel | Seaborn | Matplotlib | Scikit-learn | Microsoft Office (Excel, Word, PowerPoint)

Interests: Data Analysis | Data Science | Machine Learning | LLM
